DIVORCE EVIL FAULT OF WIVES WHO BAKE HUSBANDS BAD BREAD

Dr. H. W. Wiley, government food expert and originator of the Poison Squad, declares that dyspeptic bread is the great destroyer of domestic felicity, and that good bread would solve the divorce problem. This is what he said on the subject before the Association of American Biscuit Bakers at Atlantic City:

"Wifey's bread has been more the enemy of domestic felicity than any other one thing, and when this cause is removed we will find a good imitation of the Elysium in our kitchens. The trouble has been that lots of the bread in this country isn't fit to eat. I don't know whether you fellows made it or not, but I'm going to be frank with you and say that somebody's in the wrong somewhere, and they'd better look out.

"There's too much chemicalized flour being used. I don't see any reason why the color nature gave to flour is objectionable. "If the bakers make good bread and then educate the people to

buy their wares," he added, "the great destroyer of domestic felicity, dyspepsia, will be removed, and we will hear no more about the divorce problem."
